Fares Hamza Mahmoud Hamza

Frontend Developer | React.js | Next.js | TypeScript
Cairo, Egypt | 201021092446 | farishamza426@gmail.com | linkedin.com/in/faris-hamza | github.com/Fares426

Professional Summary

Experienced in building performant, accessible web applications with React.js, Next.js, and TypeScript, with strong skills in state management, SSR/SSG, and RESTful API integration.

Technical Skills

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js, Redux / Redux Toolkit, React Router, Context API
UI & Styling: Tailwind CSS, Bootstrap, HTML5, CSS3, Responsive Design, Mobile-First Design, Accessibility (a11y / WCAG basics)
Data Fetching & State: TanStack Query (React Query), Axios, React Hook Form, JWT Authentication, REST APIs
Build Tools & Tooling: Vite, Webpack, Git, GitHub, GitHub Actions (CI/CD), VS Code
Backend & Databases: C#, SQL Server, REST API design
Methodologies: Agile / Scrum, Component-Based Architecture, Performance Optimization, Cross-Browser Compatibility, Code Splitting, Lazy Loading

Projects

Food Rescue Platform – Graduation Project | Demo Video — Sept 2025 – June 2026
React.js, Context API, TypeScript, Tailwind CSS, REST APIs

- Engineered a full-featured admin dashboard for a food-rescue platform, centralizing donor, recipient, and logistics data into a single, real-time React interface using Redux Toolkit for global state management
- Integrated RESTful APIs for real-time order and inventory tracking, enabling operators to monitor and action events with zero page reloads

E-Commerce Web Application | Live Demo — Jan 2025 – Mar 2025
Next.js, TypeScript, Context API, Tailwind CSS, REST APIs

- Delivered a production-ready e-commerce storefront using Next.js, achieving fast page loads through SSR/SSG and a Redux Toolkit-managed cart and checkout flow
- Engineered a dynamic product catalogue with advanced filtering and search via third-party REST APIs

Social Media Application | Live Demo — May 2026 – Jun 2026
React.js, Context API, Bootstrap, REST APIs

- Developed a social networking web app featuring user authentication, post creation, and a live activity feed
- Implemented protected routing with React Router and token-based authentication, securing user-specific content within a modular, component-based architecture

Weather Application | Live Demo — Oct 2024
JavaScript (ES6+), Bootstrap 5, WeatherAPI, Async/Await

- Fetched real-time weather data and a three-day forecast using WeatherAPI with async/await
- Built an interactive search with error handling and formatted date/time; designed a responsive, mobile-friendly UI with Bootstrap 5

Bookmark Manager | Live Demo — Nov 2024
JavaScript (ES6+), Bootstrap 5, Local Storage API, Form Validation

- Built persistent bookmarks with the Local Storage API, ensuring automatic data retrieval and storage
- Created an interactive table UI with intuitive controls for adding, visiting, and removing bookmarks

Education

The Egyptian E-Learning University (EELU) — Egypt
B.Sc. — Faculty of Computers and Information | GPA: 3.74/4.0 (Excellent with Honors) — *Graduated: 2026*

Certifications

Frontend Web Development Diploma (React.js) — Professional Certificate — Sept 2024 – Feb 2025
Route Academy

- Completed an intensive, industry-focused training program covering modern JavaScript, React.js, Redux, TypeScript, and Next.js, applying skills through multiple hands-on real-world projects

Languages

Arabic: Native | English: Professional Working Proficiency
